

47-05

To Whom It May Concern:

When my partial broke on 4-7-05 I knew that there was a possibility of having to get a replacement. Knowing this, I became very anxious due to the fact I have a past history of a gazing reflex upon impressions being made, which has occurred in the past. Dr. Salesky showed me by using a few simple techniques how to relax and to my amazement I had no difficulty at all having impressions done. Thank you Dr. Salesky for making my visit a pleasant one. —

Michael [unclear]
